Five IS-2M m1944 – Unknown exact location, Safonovo, Murmansk Oblast (Russia)

It appears that 2 of the tanks have the regular IS-2 turret, the 3 others have KV-1 or KV-2 mock-up turrets. These tanks are abandoned since 1993. Until recently, they stood on a Russian army base (2 last pictures), but they were moved and now sit in an unknown location (first pictures)

IS-2 Armored Evacuation Tractor – Land Forces Museum, Bydgoszcz (Poland)

It was found on one of the military training areas in Województwo Pomorskie (Pomerania Province) by people from Magazyn Nurkowanie. (Poland) (photo and info. provided by Maciej Boruń). This is an Armored Evacuation Tractor that was created by converting an IS-2 tank in the 1950s. The conversion was to remove the 122 mm gun and mount. Probably the same was done with the machine gun and its mount in the back wall of the turret. In this way, you can store tools and spare parts in an enormous tower. Only a few of these vehicles were created. It is very likely that this vehicle served along with the 4th regiment of heavy tanks in Bydgoszcz in January 1945

IS-2 based bulldozer – Army Technical Museum, Lesany (Czech Republic)

The museum in Lesany purchased this vehicle to get the engine, gearbox and some other spare parts, in order to restore another vehicle. This IS-2 was first transformed into a SS-1b Scud A carrier, and then into a bulldozer ("patrik").

I'm looking for photos of those tanks :

any IS-2 tank that I forgot....

This document is a compilation of photos published on the web. I would like to thank especially **Rafał Białecki**, who deserved a great part of the job on this document, and also the people who took these photos and put them on their websites, or sent them to me, and those who helped me doing these lists (particularly people of the AFV News Discussion Board). For any question, you can email me at soldat_ryan@hotmail.com
