

# OFFENSIVE SECURITY FOR FINANCIAL ORGANIZATIONS

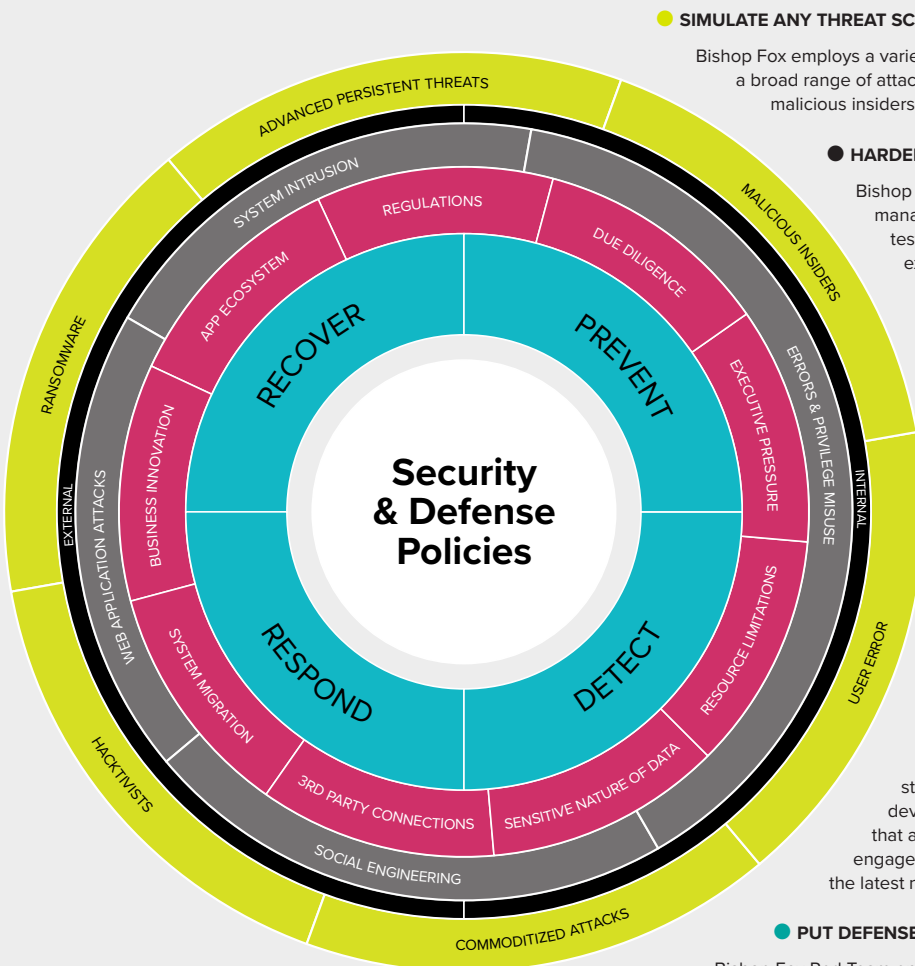

Bishop Fox partners with the world’s leading financial institutions to stress-test their defenses, applying the latest adversarial insights, tactics, and deep industry expertise to protect their critical assets, customers, and reputation.

## PROACTIVELY DEFENDING THE WORLD’S RICHEST TARGETS

Financial institutions are at the forefront of the cybersecurity battle. They face ongoing threats from various sources, including cybercriminals, insiders, state-sponsored actors, and hacktivists. The attack surface they must defend is continually expanding through digital and mobile channels, cloud services, supply chains, and M&A activity. Regulatory oversight and reporting have also intensified. Navigating these challenges requires a forward-thinking strategy.

Backed by two decades of offensive security leadership, Bishop Fox excels in meeting the stringent security needs of financial firms. Our innovative R&D team, equipped with state-of-the-art tools and methods, simulates industry-specific threats across your environment, covering everything from cloud and application security to social engineering and ransomware. Our solutions help safeguard your critical data assets and satisfy regulatory compliance.
